

Preamble:

In the course of a nation's history, it is natural that political philosophies will evolve which run contrary to the original principles evident at the time of that nation's founding. A nation founded in tyranny will by its nature spawn sentiment in direct opposition to that tyranny. Conversely, a nation which is dedicated to protecting the rights of its people, and seeks to bind the excesses of power which naturally accrue to governments, is subject to the evolution of factions which strive to throw off those shackles of restraint and gather power and influence over the people. Freedom is not a pre-existing condition into which everyone is delivered. Freedom and personal liberty are conditions of existence which are hard fought for and once won, must be maintained. Each generation must be taught anew the importance of eternal vigilance against those who would disregard the limits imposed on government, and usurp powers not granted to them by the people.

Today this state and the nation are in crisis precisely because we as a people have failed to maintain that vigilance. We have failed to pass down from one generation to another the critical knowledge and lessons that history provides. We have let rot from within, the foundation upon which freedom and prosperity must be built for it to survive.

This election cycle is unique in the history of both this state and our nation. We are presented with a situation in which **WE THE PEOPLE**, must re-educate ourselves and our neighbors, and put the knowledge of liberty to work in the elections this November. Years of neglect have allowed factions detrimental to the core principles of this nation, to entrench themselves in both political parties, and undermine the education of Constitutional principles vital to the survival of the republic.

The Tea Party movement is reminiscent of the principled revolt that led to the birth of the Republican Party in 1854. In June of that year, Horace Greeley referred to the newly formed Republicans as "...united to restore the Union to its true mission of champion and promulgator of Liberty...". This year it is incumbent upon those Republicans who strive to protect and defend our Constitution, to reclaim that heritage.

It is within this context that **We, the citizens of Maine united by free association as Republicans**, dedicated to seeing the principles which brought forth the birth and ascendance of this State and these United States once again made dominant and pledge our unwavering allegiance, not to a political party, but to the **Constitution of the State of Maine** and the **Constitution of the United States of America**. The Republican Party is the vehicle through which we seek to better unify and promote those in pursuit of these goals.

The principles upon which the Republican Party was founded, to which we as Citizens seek return, and to which we demand our elected representatives abide, are summarized as follows:

1. The Constitutions, both State and Federal, are the framework to which any and all legislation must adhere.

2. State sovereignty must be regained and retained on all issues specifically relegated to the States by the constitution.
 3. National sovereignty shall be preserved and retained as dominant over any attempted unconstitutional usurpations of such by international treaty.
 4. It is the responsibility and duty, of “We the People”, to educate both ourselves and others; to demand honest elections free of corruption, and to hold our elected officials to the highest standards of honesty, integrity and loyalty to the constitution.
-

In pursuit of these principles we endorse and shall promote the following initiatives.

I. To Form a More perfect Union
